Your ads will appear on social media, on internet websites & inside some apps

Targeting determines who will see your ads. Location & online behaviour are the main factors.

AIM uses both Google & Facebook/Instagram ads, so your property is seen by more of the right people.

A 'click' occurs when someone clicks on your ad to view your property online.

Retargeting occurs when someone who clicked on your ad, or a similar property, is shown your ad online.

Search ads are ads that appear in response to a Google search, and are included in some packages.
